Welcome to 1stJCSC

On behalf of the organizing committee, I would like to welcome you, all the participants in the 1st Japan-China Symposium on Catalysis (1stJCSC), which is held during 10-12 October 2021 in Virtual, Osaka, Japan.

Catalysis research in Japan and China has made great progress and is now leading the world. This symposium will bring together catalysis researchers from both countries to exchange cutting-edge information and engage in hot discussions, which will contribute to the further development of catalysis research. More importantly, it will deepen the understanding and friendship of researchers between the two countries, and deepen the friendship and exchange of human beings, not only academically but also culturally. I think that this symposium should take on such a place from now on. With this in mind, the symposium was scheduled originally to be held in May 2020, but was forced to be extended twice due to the spread of Corona infections. However, although it is held in Virtual, I am very happy to be able to successfully hold it and open a new door to exchanges between the two countries. Anything cannot separate our friendship.

I believe that all the participants could enjoy this symposium and JCSC could contribute to raise research activities in Asia, specially between Japan and China, not only through face-to-face but also virtual style.

I would like to express sincere thanks to organizing committee members and students for their sacrifice and contributions in preparing this symposium. Professor Feng-Shou Xiao at Zhejiang University and Professor Jinlong Zhang at East China University of Science & Technology are greatly acknowledged for their efforts as the Chinese coordinator. Financial support and dedication from Osaka University is also greatly appreciated.

Please enjoy the symposium and make good friends though the fruitful discuss on catalysis.

Chairperson, 1stJCSC
